

📌 Note on Using GitHub Repository URLs

To ensure proper functioning of the application, please follow the below instructions when providing the GitHub repository URL:

✓ Correct Format:

owner/repository

🔍 Example:

openai/gym

Instructions for Using the Data Folder

Please follow the instructions below while using this project:

1. Ensure the GitHub repository URL is properly formatted as 'owner/repository'.
2. You can find the repository URL on GitHub by navigating to the desired repository page and clicking the 'Code' button to copy the URL.
3. Example format: 'openai/gym', 'tensorflow/tensorflow'.
4. You can include the full GitHub URL (e.g., <https://github.com/openai/gym>);
5. Make sure you have a stable internet connection to allow the application to fetch data via the GitHub API.
6. Be aware that GitHub has a rate limit for API calls. If you exceed the limit, wait a few minutes before trying again.
7. Double-check for typos in the repository name before submitting.
8. This folder is intended to store any relevant files or raw data if needed in future versions. Currently, it helps structure the project.

📌 Instructions:

- Go to the GitHub repository page
- Copy the URL from the browser's address bar

- Then extract and use only the owner/repository part from it

✗ Avoid Using:

- `www.github.com/username/repo`
- `justrepo`

Using any other format may cause errors like:

✗ Failed to fetch repository statistics. Check if repo exists or API limit exceeded.

Always double-check the format before submitting.

Example for the right format:
